

PreciMIX
PNEUMATIC ADDITIVE PUMP
For aircraft refuelling PreciFUEL

COMPACT! - VISIBLE FUNCTION + FLOW
- METER AND PUMP ALL-IN-ONE

FEATURES

- Compact design
- Self priming
- 100% monitored

PreciMIX

PNEUMATIC ADDITIVE PUMP

For aircraft refuelling PreciFUEL

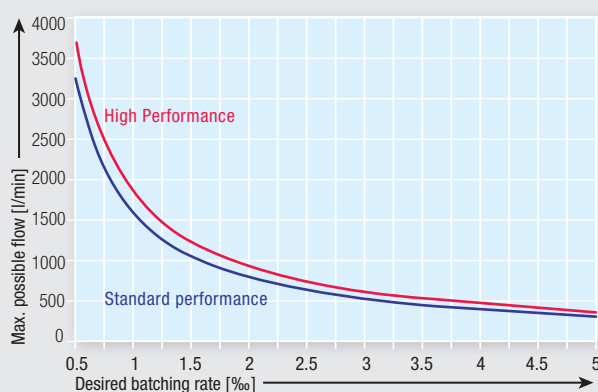

PreciMIX

Is an air operated piston pump which combines measuring and pumping in one device. With a transparent glass cylinder the function and flow can be fully visible. Since each pump stroke is monitored by an integrated NAMUR sensor and the tank is checked for low limit by float or optical sensor the operation is absolutely reliable and certified.

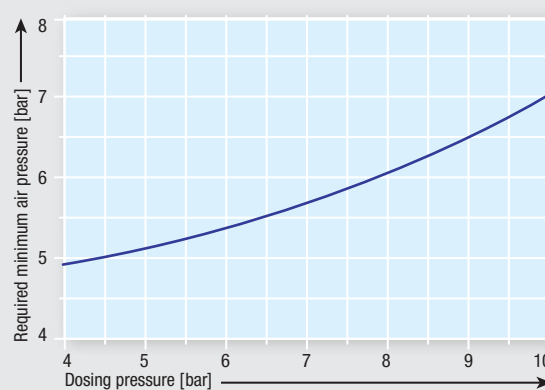

PreciMIX is integrated in PreciCONTROL and operated by the FUELmaster.

Injection pressure	4-10 bar
Necessary pn. pressure	5-7 bar
Weight	4.2 kg
FF 25/71 micro filter	10 µm mesh size
Self-priming	yes
Size D x H	100 mm x 169 mm

MAX. FLOW RATE
